I. Title And Overview

- Title: Software Test Report for School Management System
- Report Date: 30 December 2025
- Prepared By:
 - Siti Ain Athiqah - Test Lead
 - Hana Syakirah - Test Analyst
 - Muhammad Haziq - Test Analyst
- Company: School Management System Project

Overview:

This report summarizes the testing activities conducted on the School Management System. The report covers the test objectives, scope, test environment, test cases, results, defects identified, and overall conclusions. The purpose of this report is to ensure the software's quality and performance through functional and automated testing results.

II. Objectives

The primary objectives of this software test report are:

1. To validate the functionality of the School Management System (SMS) against the specified system requirements.
 2. To identify, record and document defects related to the leave application and management process.
 3. To evaluate the correctness and reliability of the system based on the results of manual and automated testing.
 4. To propose recommendations for system improvement and future testing activities based on the identified defects.
-

III. Scope

The scope of this test report includes:

- **Modules Tested**

1. **Login Module:** Ensures secure access to the system by authenticating users and redirecting them to role-based dashboards for Admin and Teacher users.
2. **Add Teacher Module:** Allows administrators to register teacher accounts with validated personal and contact information

3. **Add Student Module:** Enable administrators to register student accounts with complete personal, guardian, and contact details.
4. **Edit Profile Module:** Allows administrators to update personal profile while enforcing input validation rules.
5. **Reset Password Module:** Enable users to securely change passwords and verifies correct authentication using updated credentials.
6. **Apply Leave Module:** Allow teachers to apply for leave by submitting leave details, validating dates, and managing submitted leave records.
7. **Add Subject Module:** Allows administrators to create and publish notices with optional file attachments for system users.
8. **Add Notice Module:** Enables administrators to create and publish notices with optional file attachments for system users.
9. **Add Syllabus Module:** Allows administrators to upload syllabus files associated with selected subjects while enforcing file selection and size validation.
10. **Add Notes Module:** Enables administrators to upload study notes linked to subjects with validated file, title, and comment inputs.

- **Test Types Conducted**

- **Functional Testing:** Conducted to verify that each module (Login, Add Teacher, Add Student, Apply Leave, etc) functions according to the specified requirements for Admin and Teacher roles.
- **Input Validation Testing:** Performed to ensure the system correctly validates user inputs such as names, email formats, phone numbers, empty fields, file uploads, and leave details.
- **Boundary Value Testing:** Applied to evaluate system behaviour at boundary conditions, such as minimum input fields, invalid field length, file size limits, and single day leave applications.
- **Role-Based Access Testing:** Executed to confirm system features are accessible only to authorized roles, with Admin and Teacher users restricted to their respective dashboards and permitted operations.
- **Defect Testing and Verification:** Conducted to re-evaluate failed test cases and confirm the presence of high-severity defects related to leave application validation and duplicate leave submissions.

- **Exclusions**

- **Performance and Load Testing:** System performance under high user load or stress conditions was not evaluated.
- **Advanced Security Testing:** Security testing was limited to basic authentication and did not include vulnerability scanning, penetration testing, or authorization bypass attempts.
- **User Acceptance Testing (UAT):** End-user validation and acceptance testing were not included in this test scope.
- **Testing for Other User Roles:** Testing for Student and Owner roles and their respective dashboards was excluded from this test report.

IV. Test Environment

The testing was conducted in the following environment:

Component	Description
Operating System	Windows 10
Hardware	Intel i5 Processor, 16GB RAM
Database	MySQL
Browser	Google Chrome
Tools	Playwright

V. Test Cases and Results

A. Summary of Test Cases

Test Case ID	Test Case Description	Status	Comments
SMS_1_01	Login (Valid Credentials).	Pass	
SMS_1_02	Login (Empty Field).	Pass	
SMS_1_03	Login (Incorrect Email Format and Valid Password).	Pass	
SMS_1_04	Login (Incorrect Email Format	Pass	

	and Invalid Password).		
SMS_1_05	Login (Valid Email Format and Incorrect Password).	Pass	
SMS_2_01	Add Teacher (Valid Information).	Pass	
SMS_2_02	Add Teacher (Empty Fields).	Pass	
SMS_2_03	Add Teacher (Invalid First and Last Name)	Pass	
SMS_2_04	Add Teacher (Incorrect Phone Number Length).	Pass	
SMS_2_05	Add Teacher (Invalid Email Address).	Pass	
SMS_2_06	Add Teacher (Invalid Guardian Name).	Pass	
SMS_2_07	Add Teacher (Incorrect Guardian Phone Number Length).	Pass	
SMS_3_01	Add Student (Valid Information).	Pass	
SMS_3_02	Add Student (Empty Fields).	Pass	
SMS_3_03	Add Student (Invalid First And Last Name).	Pass	
SMS_3_04	Add Student (Invalid Father's Name).	Pass	
SMS_3_05	Add Student (Invalid Phone Number Length)	Pass	
SMS_3_06	Add Student (Invalid Email Address).	Pass	
SMS_3_07	Add Student (Invalid Guardian Name).	Pass	
SMS_3_08	Add Student (Invalid Guardian Phone Number Length).	Pass	

SMS_4_01	Update profile (Valid Information).	Pass	
SMS_4_02	Update profile (Empty Name Field).	Pass	
SMS_4_03	Update profile (Alphabet in Phone Number Field).	Pass	
SMS_4_04	Update address (Empty Field).	Pass	
SMS_5_01	Change password (Valid Current and New Password).	Pass	
SMS_5_02	Change password (Non-matching New and Confirm Password).	Pass	
SMS_5_03	Login account with old password.	Pass	
SMS_5_04	Login account with new password.	Pass	
SMS_6_01	Apply leave (Valid Information)	Pass	
SMS_6_02	Apply leave (Invalid Leave Type)	Pass	
SMS_6_03	Apply leave (Invalid Description)	Pass	
SMS_6_04	Apply leave (Invalid Date)	Pass	
SMS_6_05	Apply leave (Start Date and End Date on the same day).	Fail	The system rejects the user's application for the same day leave.
SMS_6_06	Apply the same leave twice.	Fail	The system accepts the leave applied by the user even though the details of the input are the same as when first applied.
SMS_6_07	Edit leave applied after submitting.	Pass	
SMS_6_08	Delete applied leave after submitting.	Pass	

SMS_7_01	Add Subject (Valid Subject Name).	Pass	
SMS_7_02	Add Subject (Empty Subject Name).	Pass	
SMS_7_03	Add Existing Subject.	Pass	
SMS_8_01	Add Notice (Valid Title, Body and select a file).	Pass	
SMS_8_02	Add Notice (Valid Title and Body but not selected a file).	Pass	
SMS_8_03	Add Notice (Valid Title but empty Body and not selected a file).	Pass	
SMS_8_04	Add Notice (Empty Title but Valid Body and not selected a file).	Pass	
SMS_8_05	Add Notice (Empty Fields and not selected file).	Pass	
SMS_9_01	Add Syllabus (Selected Subject name and selected a file).	Pass	
SMS_9_02	Add Syllabus (Subject name not selected but selected a file).	Pass	
SMS_9_03	Add Syllabus (Selected Subject name but not selected a file).	Pass	
SMS_9_04	Add Syllabus (Subject name and file are not selected).	Pass	
SMS_9_05	Add Syllabus (Selected subject name and file but file is too large).	Pass	
SMS_10_01	Upload Notes (Selected Subject name, valid title and comment, and selected a file).	Pass	

SMS_10_02	Upload Notes (Subject name is not selected, empty title and comment, and not selected a file).	Pass	
SMS_10_03	Upload Notes (Subject name is not selected, valid title and comment, and selected a file).	Pass	
SMS_10_04	Upload Notes (Selected Subject name, empty title, valid comment and selected a file).	Pass	
SMS_10_05	Upload Notes (Selected Subject name, valid title, empty comment and selected a file).	Pass	
SMS_10_06	Upload Notes (Selected Subject name, valid title, valid comment but not selected a file).	Pass	
SMS_10_07	Upload Notes (Selected Subject name, valid title, valid comment and selected a file but file is too large).	Pass	

B. Detailed Test Cases

i. Login Module

Test Case ID:	SMS_1_01
Description:	Login (Valid Credentials).
Preconditions:	The administrator account exists with the following credentials: - Email: admin@gmail.com - Password: 123
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. Enter admin@gmail.com into the email input field. 4. Enter 123 into the password input field. 5. Click the Login (Submit) button.
Expected Result:	The user is redirected to the Admin Panel dashboard.
Actual Result:	The user is redirected to the Admin Panel dashboard.
Status:	Pass

Comments:	
------------------	--

Test Case ID:	SMS_1_02
Description:	Login (Empty Field).
Preconditions:	The administrator account exists with the following credentials: - Email: admin@gmail.com - Password: 123
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. Leave the email field empty. 4. Leave the password field empty. 5. Click the Login (Submit) button.
Expected Result:	The system prevents form submission, remains on the login page, and displays a validation message for the email field: "Please fill out this field."
Actual Result:	The system prevents form submission, remains on the login page, and displays a validation message for the email field: "Please fill out this field."
Status:	Pass
Comments:	

Test Case ID:	SMS_1_03
Description:	Login (Incorrect Email Format and Valid Password).
Preconditions:	The administrator account exists with the following credentials: - Email: admin@gmail.com - Password: 123
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. Enter wrong into the email field. 4. Enter 123 into the password field. 5. Click the Login (Submit) button.
Expected Result:	The system blocks form submission and displays an email format validation message: "Please include an @ in the email address."
Actual Result:	The system blocks form submission and displays an email format validation message: "Please include an @ in the email address."
Status:	Pass
Comments:	

Test Case ID:	SMS_1_04
Description:	Login (Incorrect Email Format and Password).
Preconditions:	The administrator account exists with the following credentials: - Email: admin@gmail.com - Password: 123
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. Enter wrong@example.com into the email field. 4. Enter wrongpass into the password field. 5. Click the Login (Submit) button.
Expected Result:	The system displays an error message indicating incorrect login credentials: "Invalid email or password!".
Actual Result:	The system displays an error message indicating incorrect login credentials: "Invalid email or password!".
Status:	Pass
Comments:	

Test Case ID:	SMS_1_05
Description:	Login (Valid Email Format and Incorrect Password).
Preconditions:	The administrator account exists with the following credentials: - Email: admin@gmail.com - Password: 123
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. Enter admin@gmail.com into the Email field. 4. Enter wrongpass into the Password field. 5. Click the Login (Submit) button.
Expected Result:	The system displays an error message indicating incorrect login credentials: "Invalid email or password!".
Actual Result:	The system displays an error message indicating incorrect login credentials: "Invalid email or password!".
Status:	Pass
Comments:	

ii. Add Teacher Module

Test Case ID:	SMS_2_01
Description:	Add Teacher (Valid Information).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Enter the valid field details for three sections: a. Personal information. b. Address Details c. Emergency contact or guardian 4. Click the "Submit" button.
Expected Result:	The system displays the successful message and redirects to the Teacher module page.
Actual Result:	The system displays the successful message and redirects to the Teacher module page.
Status:	Pass
Comments:	

Test Case ID:	SMS_2_02
Description:	Add Teacher (Empty Fields).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert an empty field for the Personal Information form. 4. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "required," and the full name must be entered in letters.
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "required," and the full name must be entered in letters.
Status:	Pass
Comments:	

Test Case ID:	SMS_2_03
Description:	Add Teacher (Invalid First and Last Name).

Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert valid values for the Personal Information form, except for the full name, which has been entered as a number. 4. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation messages are "First name must contain only letters!" and "Last name must contain only letters!".
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation messages are "First name must contain only letters!" and "Last name must contain only letters!".
Status:	Pass
Comments:	

Test Case ID:	SMS_2_04
Description:	Add Teacher (Invalid Phone Number Length).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form, except for the phone number, which has more than 10 digits. 6. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Status:	Pass
Comments:	

Test Case ID:	SMS_2_05
Description:	Add Teacher (Invalid Email Address).

Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form, except for the email, which has the incorrect email format without @. 6. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid email address."
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid email address."
Status:	Pass
Comments:	

Test Case ID:	SMS_2_06
Description:	Add Teacher (Invalid Guardian Name).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form. 6. Click the "Next" button. 7. Insert valid values for the Emergency Contact or Guardian form, except for the guardian name, which has been entered as a number. 8. Click the "Submit" button.
Expected Result:	The system blocks form submission and remains on that page. The text field's validation message is "Guardian name must contain only letters!".
Actual Result:	The system blocks form submission and remains on that page. The text field's validation message is "Guardian name must contain only letters!".
Status:	Pass
Comments:	

Test Case ID:	SMS_2_07
Description:	Add Teacher (Invalid Guardian Phone Number Length).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Teacher module. 2. Click the add button to add teacher details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form. 6. Click the "Next" button. 7. Insert valid values for the Emergency Contact or Guardian form, except for the guardian phone number, which has more than 10 digits. 8. Click the "Submit" button.
Expected Result:	The system blocks form submission and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Actual Result:	The system blocks form submission and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Status:	Pass
Comments:	

iii. Add Student Module

Test Case ID:	SMS_3_01
Description:	Add Student (Valid Information).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Enter the valid field details for three sections: a. Personal information. b. Address Details c. Emergency contact or guardian 4. Click the "Submit" button.
Expected Result:	The system displays the successful message and redirects to the Student module page.
Actual Result:	The system displays the successful message and redirects to the Student module page.
Status:	Pass
Comments:	

Test Case ID:	SMS_3_02
Description:	Add Student (Empty Fields).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert an empty field for the Personal Information form. 4. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "required," and the full name must be entered in letters.
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "required," and the full name must be entered in letters.
Status:	Pass
Comments:	

Test Case ID:	SMS_3_03
Description:	Add Student (Invalid First and Last Name).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form, except for the full name, which has been entered as a number. 4. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation messages are "First name must contain only letters!" and "Last name must contain only letters!".
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation messages are ""First name must contain only letters!" and "Last name must contain only letters!".
Status:	Pass
Comments:	

Test Case ID:	SMS_3_04
Description:	Add Student (Invalid Father's Name).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form, except for the father's name, which has been entered as a number. 4. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Father name must contain only letters!".
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Father name must contain only letters!".
Status:	Pass
Comments:	

Test Case ID:	SMS_3_05
Description:	Add Student (Invalid Phone Number Length).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form, except for the phone number, which has more than 10 digits. 6. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Status:	Pass
Comments:	

Test Case ID:	SMS_3_06
Description:	Add Student (Invalid Email Address).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form, except for the email, which has the incorrect email format without @. 6. Click the "Next" button.
Expected Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid email address."
Actual Result:	The system blocks form submission to the next section and remains on that page. The text field's validation message is "Please enter a valid email address."
Status:	Pass
Comments:	

Test Case ID:	SMS_3_07
Description:	Add Student (Invalid Guardian Name).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form. 6. Click the "Next" button. 7. Insert valid values for the Emergency Contact or Guardian form, except for the guardian name, which has been entered as a number. 8. Click the "Submit" button.
Expected Result:	The system blocks form submission and remains on that page. The text field's validation message is "Guardian name must contain only letters!"
Actual Result:	The system blocks form submission and remains on that page. The text field's validation message is "Guardian name must contain only letters!"
Status:	Pass

------------------	--

Test Case ID:	SMS_3_08
Description:	Add Student (Invalid Guardian Phone Number Length).
Preconditions:	The user must be logged in as a Teacher/Admin.
Steps:	1. Navigate to the Student module. 2. Click the add button to add student details. 3. Insert valid values for the Personal Information form. 4. Click the "Next" button. 5. Insert valid values for the Address Details form. 6. Click the "Next" button. 7. Insert valid values for the Emergency Contact or Guardian form, except for the guardian phone number, which has more than 10 digits. 8. Click the "Submit" button.
Expected Result:	The system blocks form submission and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Actual Result:	The system blocks form submission and remains on that page. The text field's validation message is "Please enter a valid 10-digit phone number."
Status:	Pass
Comments:	

iv. Edit Profile Module

Test Case ID:	SMS_4_01
Description:	Update profile (Valid Information).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Edit Profile" button. 3. Enter the valid details for seven text fields: a. First Name b. Last Name c. Date of Birth d. Gender e. Phone Number f. Address 4. Click on the "Save Changes" button. 5. Click the "Yes" button when the confirmation dialog appears.

Expected Result:	The edited details appeared at the settings panel.
Actual Result:	The edited details appeared at the settings panel.
Status:	Pass
Comments:	

Test Case ID:	SMS_4_02
Description:	Update profile (Empty Name Field).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Edit Profile" button. 3. Enter the valid details for all text fields except First Name and Last Name. 4. Click on the "Save Changes" button.
Expected Result:	The system blocks the user from saving changes and highlights the empty text field, prompting the user to enter the details.
Actual Result:	The system blocks the user from saving changes and highlights the empty text field, prompting the user to enter the details.
Status:	Pass
Comments:	

Test Case ID:	SMS_4_03
Description:	Update profile (Alphabet in Phone Number Field).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Edit Profile" button. 3. Enter the valid details for all text fields except Phone Number. 4. Enter a mix of numbers and alphabets. 5. Click on the "Save Changes" button.
Expected Result:	The system blocks the user from saving changes and highlights the text field, showing dialog, asking the user to enter a valid phone number.
Actual Result:	The system blocks the user from saving changes and highlights the text field, showing dialog, asking the user to enter a valid phone number.
Status:	Pass

Comments:	
------------------	--

Test Case ID:	SMS_4_04
Description:	Update address (Empty Field).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Edit Profile" button. 3. Enter the valid details for all text fields except address. 4. Click on the "Save Changes" button.
Expected Result:	The system blocks the user from saving changes and highlights the empty text field, prompting the user to enter the details.
Actual Result:	The system blocks the user from saving changes and highlights the empty text field, prompting the user to enter the details.
Status:	Pass
Comments:	

v. Reset Password Module

Test Case ID:	SMS_5_01
Description:	Change password (Valid Current and New Password).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Change Password" button. 3. Enter the current password in the current password text field. 4. Enter the new password in the new password text field. 5. Enter the same new password in the confirm password text field. 6. Click on the "Save" button.
Expected Result:	A popup appears, telling the user that the password has been successfully changed.
Actual Result:	A popup appears, telling the user that the password has been successfully changed.
Status:	Pass
Comments:	

Test Case ID:	SMS_5_02
----------------------	----------

Description:	Change password (Non-matching New and Confirm Password).
Preconditions:	The user must be logged in as an Admin.
Steps:	1. Navigate to the Settings module. 2. Click on the "Change Password" button. 3. Enter the current password in the current password text field. 4. Enter the new password in the new password text field. 5. Enter a different new password in the confirm password text field. 6. Click on the "Save" button.
Expected Result:	An error message displayed, telling users to ensure that the updated password and confirm password text field must be the same.
Actual Result:	An error message displayed, telling users to ensure that the updated password and confirm password text field must be the same.
Status:	Pass
Comments:	

Test Case ID:	SMS_5_03
Description:	Login account with old password.
Preconditions:	The user successfully changed their password.
Steps:	1. Open a web browser. 2. Navigate to the login page. 3. User enters the email as registered. 4. User enters the old password. 5. User clicks the "Submit" button.
Expected Result:	A popup or message appears, telling the user that the email or password entered is invalid.
Actual Result:	A popup or message appears, telling the user that the email or password entered is invalid.
Status:	Pass
Comments:	

Test Case ID:	SMS_5_04
Description:	Login account with new password.
Preconditions:	The user successfully changed their password.

Steps:	1. Open a web browser. 2. Navigate to the login page. 3. User enters the email as registered. 4. User enters the updated password. 5. User clicks the "Submit" button.
Expected Result:	Login is successful and the system is redirected to the main dashboard.
Actual Result:	Login is successful and the system is redirected to the main dashboard.
Status:	Pass
Comments:	

vi. Apply Leave Module

Test Case ID:	SMS_6_01
Description:	Apply leave (Valid Information).
Preconditions:	The user must be logged in as a teacher.
Steps:	1. Navigate to the Leaves module. 2. Enter the valid details for all text fields (Leave Type, Leave Description, Start Date, End Date). 3. Click on the "Submit" button.
Expected Result:	A popup message informing that leave application has been submitted and application request is shown on the list of leaves.
Actual Result:	A popup message informing that leave application has been submitted and application request is shown on the list of leaves.
Status:	Pass

VI. Defect Summary

A. Summary of Defects

Defect ID	Description	Severity	Status	Assigned To
D001	The system rejects the teacher's application for 1 day leave.	High	Open	Hana Syakirah
D002	The system accepts duplication of leave applied by teachers.	High	Open	Hana Syakirah

B. Detailed Defect

Defect ID:	D001
Description:	The system rejects the teacher's application for 1 day leave.
Severity:	High
Status:	Open
Steps to Reproduce:	1. Open a web browser. 2. Navigate to the login page and successfully log in as a teacher. 3. Click on the Leaves module. 4. Enter the valid details for all text fields (Leave Type, Leave Description). 5. Enter the same date for leave in "Start Date" and "End Date". 6. Click on the "Submit" button.
Expected Result:	The system rejects the application made by the user, then displays an error in the date text field, asking the user to ensure the start date is less than the end date.
Actual Result:	System receives the application leave made by the user and displays the application in the List of Leaves.
Assigned To:	Hana Syakirah

Defect ID:	D002
Description:	The system accepts duplication of leave applied by teachers.
Severity:	High
Status:	Open
Steps to Reproduce:	1. Open a web browser. 2. Navigate to the login page and successfully log in as a teacher. 3. Click on the Leaves module.

	4. Enter the valid details for all text fields (Leave Type, Leave Description Start Date, End Date). 5. Click on the "Submit" button. 6. Repeat steps 1-4, with the same input values, then click the "Submit" button.
Expected Result:	The system rejects the duplicated leave application made by the user and asks the user to ensure no same details are entered.
Actual Result:	The system receives the application made by the user and displays in the list of leaves applied.
Assigned To:	Hana Syakirah

VII. Conclusion and Recommendations

A. Conclusion

The testing of the School Management System revealed some issues, particularly with duplication and unnecessary rejection of valid fields. The software meets most functional requirements but requires further refinement to address the identified defects.

- **Primary Concerns:** Critical issues were in the application validation logic, particularly involving date handling and duplication control. These defects affect the accuracy and reliability of the leave application process.
- **System Integrity:** The system incorrectly rejects valid leave applications when a teacher applies for a one-day leave using the same start and date. This reflects a flaw in the business rule validation, where valid input is treated as invalid.
- **Data Consistency:** High-severity defects were also discovered where the system allows duplicate leave applications with identical details to be submitted and stored. This may lead to inaccurate leave records and administrative confusion.

B. Recommendations

To improve the quality and reliability of the system, the following recommendations are proposed:

1. **Improve Data Validation Logic:** The system should be enhanced to correctly handle single-day applications by allowing the start date and end date to be the same. Validation rules must be updated to accept cases where the start date is equal to or earlier than the end date, following real-world leave policies.
2. **Implement Duplicate Detection for Applying Leave:** A duplication leave check should be applied, where the system should verify whether a leave record with the

same teacher ID, leave type, start date, and end date and reject duplicate submissions.

3. **Enforce Server-Side Business Rule Validation:** All leave validation rules should be enforced on the server side, not just on the client side. This ensures that invalid or duplicated leave applications cannot be submitted through repeated requests or browser refreshes.
4. **Enhance User Feedback and Error Messaging:** Clear and information error messages should be displayed when a leave application is rejected. The system should explain the exact reason for the error, instead of simply displaying a message saying “required!” when the input entered is incomplete.

The screenshot shows the 'Leaves' page in an ERP system. On the left is a sidebar with navigation links: Dashboard, Student, Attendance, Notice Board, Time Table, Syllabus, Notes, Marks, Leaves (highlighted), Settings, and Logout. The main content area has a 'New Leave' form and a 'Leaves' list.

New Leave Form:

- Leave Type:** A dropdown menu showing '--select--' with a red border and a 'required!' error message below it.
- Leave Description:** A text area containing 'Visiting parents at my hometown' with a green checkmark.
- Start Date:** A date picker showing '18/01/2026' with a green checkmark.
- End Date:** A date picker showing '19/01/2026' with a green checkmark.
- SUBMIT:** A blue button at the bottom right of the form.

Leaves List:

Leave Type	Date	Action
Medical Leave	17 Jan, 2026	▼
Marriage Leave	16 Jan, 2026	▼

Navigation buttons: prev, 1, next.

Figure 30. Apply leave (Invalid Leave Type).

The screenshot shows the 'Leaves' page in an ERP system. On the left is a sidebar with navigation links: Dashboard, Student, Attendance, Notice Board, Time Table, Syllabus, Notes, Marks, Leaves (highlighted), Settings, and Logout. The main content area has a 'New Leave' form and a 'Leaves' list.

New Leave Form:

- Leave Type:** A dropdown menu showing 'Casual Leave' with a green checkmark.
- Leave Description:** An empty text area with a red border and a 'required!' error message below it.
- Start Date:** A date picker showing '18/01/2026' with a green checkmark.
- End Date:** A date picker showing '19/01/2026' with a green checkmark.
- SUBMIT:** A blue button at the bottom right of the form.

Leaves List:

Leave Type	Date	Action
Medical Leave	17 Jan, 2026	▼
Marriage Leave	16 Jan, 2026	▼

Navigation buttons: prev, 1, next.

Figure 31. Apply leave (Invalid Description).

The screenshot shows the 'Leaves' management interface in an ERP system. On the left is a sidebar with navigation links: Dashboard, Student, Attendance, Notice Board, Time Table, Syllabus, Notes, Marks, Leaves (highlighted), Settings, and Logout. The main content area is titled 'Leaves' and contains two panels. The 'New Leave' panel on the left has the following fields: 'Leave Type' (dropdown menu showing 'Casual Leave' with a green checkmark), 'Leave Description' (text area with 'Applying leave to visit my parents at hometown.' and a green checkmark), 'Start Date' (calendar icon, placeholder 'dd/mm/yyyy', and a red 'required' error message), and 'End Date' (calendar icon, placeholder 'dd/mm/yyyy', and a red 'required!' error message). A blue 'SUBMIT' button is at the bottom. The 'Leaves' panel on the right shows a list of existing leaves: 'Medical Leave' on '17 Jan, 2026' and 'Marriage Leave' on '16 Jan, 2026'. Each entry has a dropdown arrow. At the bottom of the list are 'prev', '1', and 'next' navigation buttons.

Figure 32. Apply leave (Invalid Date).

The screenshot shows the 'Leaves' management interface after editing. The 'Edit Leave' panel on the left now has: 'Leave Type' (dropdown menu showing 'Medical Leave'), 'Leave Description' (text area with 'Go for a medical checkup'), 'Start Date' (calendar icon, value '19/01/2026'), and 'End Date' (calendar icon, value '20/01/2026'). A blue 'UPDATE' button is at the bottom. The 'Leaves' panel on the right remains the same, showing the list of existing leaves with 'prev', '1', and 'next' navigation buttons.
